

YOUR GENES, YOUR CANCER, YOUR PERSONALIZED TREATMENTS

Scott M. Lippman, MD, Professor of Medicine; Senior Associate Dean and Associate Vice Chancellor for Cancer Research and Care, Chugai Pharmaceutical Chair in Cancer

Our understanding and treatment of cancer is in the midst of unprecedented transformational change – translating into novel therapies at a pace never before seen. As Director of UC San Diego Moores Cancer Center, Dr. Lippman will share recent advances that have launched the era of personalized medicine and precision cancer therapy. Moores is the only NCI-designated comprehensive cancer center in San Diego, and its close proximity and formal affiliation with Salk Institute and Sanford-Burnham Medical Research Institute have led to exceptional academia-industry interactions. The presentation will highlight our unique biomedical environment, including the recent, unprecedented genomics collaboration with the J. Craig Venter Institute and Human Longevity, Inc.

Scott M. Lippman, MD, has more than 25 years' experience as principal investigator of translational research involving investigator-initiated clinical trials; he also maintains an active clinical practice.
