

Bringing Democracy: How UC San Diego Innovations Prevent Election Fraud in Developing Countries

Clark C. Gibson, PhD, Director, International Studies Program; Professor of Political Science

Election fraud is rife in emerging and fragile democracies, and domestic and international groups have used different methods to detect and deter it. Professor Gibson will examine current trends in the fight for free and fair elections, and review his own research in Afghanistan, Uganda and Kenya on the use and effectiveness of smartphones, custom applications and citizens in detecting and suppressing electoral fraud.
