The Art and the Science: The Future of Film-going as Defined by UC San Diego
Rebecca Webb, BFA, Art Power Film Curator, Founder of the Filmatic Festival, Fine Art Photographer

Today’s scientists are using technology to represent their ideas visually, and to communicate science cinematically. In turn, advances in science and technology are changing how audiences view films and how artists visually tell their stories. Rebecca Webb, ArtPower’s Filmatic Festival Founder, will discuss the future of digital media through the lens of interdisciplinary work by UC San Diego faculty, students and international artists.

ArtPower at UC San Diego builds creative experiences in music, dance, film, exhibition and food to engage diverse audiences – UC San Diego students, the community, K-12 youngsters – through the vibrant, challenging, multi-disciplinary performances of emerging and renowned international artists.
